

Every Minute Matters

How ArcTime Benefits

Employees

Track the time spent on tasks and stay on schedule.

Team Leaders

Monitor daily productivity and task completion rates, and adjust task plans as needed.

Project Managers

Keep an eye on project budgets, optimize resource allocation, and set clear task durations.

Top Features of ArcTime

Time Tracking

Employee Scheduling

Project Monitoring

Payroll & Accounting

The ArcTime Advantage

Extensive Automation

Simplify overtime, accruals, and break time calculations. Create custom rules and configure them according to your needs—it's all automated!

Accurate Payroll Data

Get error-free payroll numbers with accurate timesheet data. Effortlessly sync work time data with your payroll tool.

Intuitive UI

Enjoy seamless navigation with self-help prompts and an easy-to-use design. Fewer screens, more actions!

Notifications & Reminders

Managers get timely notifications for timesheet and leave approvals. Employees receive reminders for logins and breaks.

Key areas where ArcTime helps your business

✓ Make accurate project estimates

✓ Improves the workload and capacity planning

✓ Better the client/project profitability ratio

✓ Enhances the time tracking compliance

What sets ArcTime apart?

Flexible Time Capture Formats

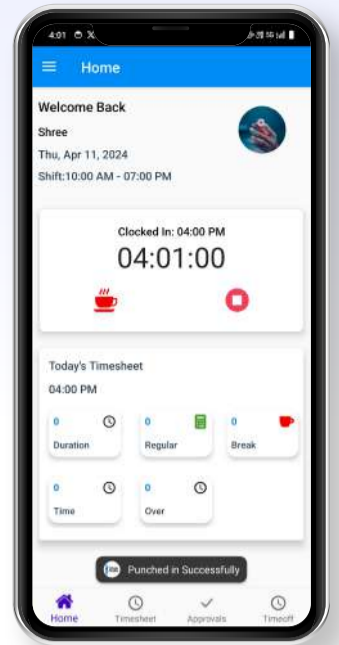

Mobile Time Clock

Use Case:

Perfect for businesses with off-site and field teams.

Advantage:

Employees can use the mobile time clock app on any device to record their actions—log in, log out, breaks, and more. Utilize geofencing to limit log-ins to designated locations.

Time Clock Kiosk

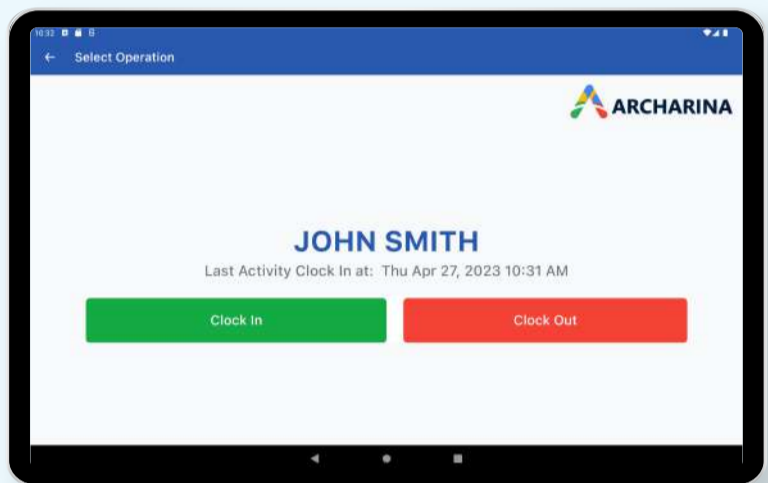

Use Case:

Great for businesses with an on-site workforce.

It's also handy for field service teams working at specific locations.

Advantage:

Create a time clock model tailored to your business needs. Configure the system based on various tasks and activities in your operations, and start tracking time quickly.

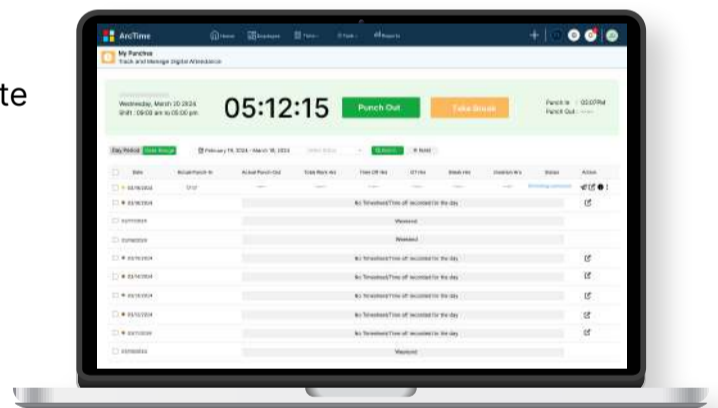

Time Clock Web

Use Case:

Ideal for businesses with a mix of remote and on-site teams.

Advantage:

Get more done with ArcTime's time clock web application! Schedule employee shifts and manage timings without confusion. If conflicts arise with scheduling or clock ins, you can resolve them quickly. The time approval process is straightforward, and the web app is user-friendly.

Biometric Time Clock

Use Case:

Best for businesses dealing with buddy punching issues.

Advantage:

Experience one of the most advanced time clock methods for secure and verified clock-ins. Employees can clock in using their unique passcode, scanning their fingerprint, or validating the RFID on the card reader.
